RA Family: Windows System Commands Fail to Run from e2studio from the Build Steps Option in FSP 3.7.0 and Later

Last Updated:06/10/2022

Issue

Windows Systems Commands don't run in FSP 3.7.0 and later (will fail), but Linux System Commands will run.

Example of copy command failing:

Solution:

Use Linux commands instead. For example, Changing del => rm, and copy => cp should allow the build to complete without these error messages from the pre-build step.
